# THE IDEAL TRUCK WHEN VERSATILITY AND EFFICIENCY ARE OF MOST IMPORTANCE.

When you need a truck that can handle scattered stops, rural areas, parks and recreation, university campuses and all other locations where a smaller truck makes sense, the MPD15 is the collection unit for you.

The MPD15 large volume receiving hoppers are located so the operator has easy access to them. Other features include simple uncomplicated controls, simultaneous loose refuse and semi-automatic cart loading. The hopper lift system is exclusively available with our route-proven dump body. Other low maintenance features include a simple electrical system that requires no air limit, or proximity switches on the lift mechanism. There is no need for PLC or computer control of lift or packer.

Plus, we keep you on budget. The MPD15 fits in the class six category. This means a CDL is not necessary to operate this unit. The MPD15 is the right solution with an affordable price tag, low maintenance features and a trained service team to back you up.

## Constructed for Maximum Durability

The MPD15 features our route-proven continuous pack, telescopic dump body platform on a straight frame chassis. Roof, sides and tailgate are constructed of 12 gauge steel along with a seamless Hardox® 450 Steel floor.

## Easy to Maintain

The MPD15 offers a cost effective single section gear pump, 10 G.P.M. at idle.

## Maximum Safety

Low container dump height with a shrouded hopper to reduce blown debris. LED body and work lights along with up to four optional cameras for operator safety and ease-of-operation.

## Reduced Fuel Consumption

Fuel efficient engine idle operation of lift saves not only fuel, but engine wear.

## Best Payload for Supreme Productivity

Our unique body is designed to collect more and meet legal payloads.

### Also Available:

- 13 Cubic Yard Capacity
- 20 Cubic Yard Capacity
